ABSTRACT

A teaching guide, developed for an oral English program for non-English-speaking children, uses the familiar social setting of the Navajo Indian child as a basis for instruction. Pictures are used for conversation and vocabulary development and for helping the child develop his self-concept by presenting experiences with which he can identify. The guide employs 4 basic steps in teaching oral English: presentation, imitation, repetition, and substitution. Objectives, vocabulary, and basic sentence structures are presented for each unit. Teaching procedures and related activities are described in each lesson within the unit. A bibliography of suggested enrichment materials is included. (JH)

FOREWORD

This program has been designed to meet the needs of the monolingual and the bilingual child. It is an attempt to motivate, stimulate, and challenge the child into using correct and expressive oral English. It is believed by the research staff that by using a familiar social setting, and objects which make up a part of the child's emotional experiences, there will be an arousal of the child's interest in expressing himself more readily in the English language.

The teacher will note that the illustrations in this book have been designed to be used with the teaching suggestions in Part Two, however, the imaginative teacher may use them to enrich and enforce other teaching areas as well.

Part One of this guide presents an extensive program for teaching sentence structures and vocabulary to the non-English speaking child. Part Two presents a program designed primarily for expansion of the sentence patterns and vocabulary learned in Part One. Part Two, also, provides for child creativity and freedom of expression through the varied activities listed in the teaching suggestions.

Curriculum is constructed to meet the educational needs of children. Since curriculum is an important facet of school life, the teacher who implements the program is a vital and important person. The acceptance of this statement places great responsibility on the classroom teacher. This responsibility is to inspire, encourage, and motivate the child to become a true bilingual.

It is not the intent of this program to prepare bilinguals for artificial orations in English, but to build

on the child's mental powers to help him speak and think in the English language on an equal basis with his native language.

INTRODUCTION

The materials and procedures presented in this guide are the collective results of the research and teaching experiences of the writers. It is the opinion of the research staff that this guide, if used objectively and conscientiously, will greatly aid all teachers of beginning non-English speaking children, and will add a new dimension to the learning scheme of the monolingual.

This Oral English program changes nothing of the teaching curriculum except the old methods of teaching English as a second language. The rest of the materials which have always been presented in the readiness program should be presented in the usual manner.

Left to right progression, visual discrimination, classification, association and concept broadening, should be presented and taught as it is felt the children need them and are ready for them. Some of them can be integrated with the Oral English program and some cannot. It is desirable to integrate as much as possible in all areas. When arithmetic is being taught, sentence patterns can be used. Counting can be done in the talking groups. An example of this is, "How many boys do you see?" or "What do you see?" The child must answer, "I see four boys." or "I see three green balls."

This program is not difficult to teach once the teacher understands some of the basic principles.

There are four basic steps involved in teaching Oral English lessons. They are as follows: 1. Presentation; 2. Imitation; 3. Repetition; 4. Substitution.

Presentation by the teacher takes much oral explanations. Each pattern should be repeated at least three times before the children are asked to respond.

Children learn by imitation and love to repeat. They do not tire easily of repetition and drill, however, it should be presented in as many different ways as possible.

Substitution of words in a given pattern allows for creativity in the children.

When the program is begun, sentences should be kept to six syllables or less if at all possible.

The teacher must try to control her own vocabulary at the beginning of the program.

The entire class should be taught together for the first few days of school before trying to group the children. Groups must remain flexible throughout the school year.

The lessons in this guide are not set up to cover any specific length of time. Token understanding is never sufficient. Learning does not take place without understanding. For optimum learning, the procedure laid out in these plans should continue for as many consecutive school days as is necessary for individuals in the group to master these patterning sequences. The guide is flexible enough to allow the teacher to move on as the children are ready. Insight into a pattern is not enough. A child must master a language item and be able to produce it spontaneously and automatically in a correct context before he is expected to move on to the next language item. Strict attention must be paid to sound patterns, stress, and intonation, semantics, and syntactic structure.

Oral English is learned best in a relaxed atmosphere in which language flourishes. There should be a happy, wholesome relationship between the teacher and the children and among the children themselves. There should be many dynamic, on-going interests in the room at all times.

There are some basic rules for teaching this program which the writers feel are very important:

- i. Always be gentle, patient and understanding, and as relaxed as possible.

2. Structure and sequence are very rigid and no part may be omitted.
3. Always teach correct forms of vocabulary in context.
 - a. Vocabulary is important but is not the most important part of this program.
 - b. Teach any form of verb you wish to teach in context.
 - c. Teach minimal pairs, contrastive drills, etc. in isolation if you wish, but immediately put each word in a known pattern.
4. Always teach structures in a normal utterance.
5. Always allow plenty of time for free talk.
6. Center vocabulary around one topic. Group sentences as to subject interest.
7. Make dialogue such that student associates the word in the way it is usually used.
8. Use substitution drills. Reintroduce vocabulary item many times in all situations and structures in which they can be used.
9. Never teach any vocabulary word or sound in isolation.
10. Function words must be taught in context. Function words are used in English to express relationships or meanings. Authorities say there are some 150 to 300 of these words which must be taught to non-English speakers. Some of those most frequently used are:
 - a. Articles or determiners: a, the, an, this, some
 - b. Auxiliaries: do, have, be
 - c. Prepositions: at, by, for, from, of, on, in, with, etc.
 - d. Conjunctions: and, but, until, although, etc.

e. Interrogatives: when, where, etc.

f. Degree words: more, most, very, too

g. Modal: may, might, can, go, should, ought to, must, have to.

Idioms and idiomatic expressions are a part of the English language and must be taught when

needed. This will probably be late in the first year when the child understands a great deal of English.

UNIT I

TEACHER SUGGESTIONS

The picture book Phillip and His Family was developed, primarily, as a conversation and vocabulary development guide for children in pre-education and pre-first grades in the Shiprock area. The pictures in this book may be used during the entire year with the oral English program. The writers feel that these pictures will give the child something with which to identify, and thus encourage him to speak more freely. The pictures should also be an asset in helping the child develop his self-concept.

Phillip and His Family is organized in unit form, but the teacher may use individual pictures from any unit, at any time she feels that the picture will implement her oral English presentation. These pictures should be used for general talking practice, and may be reused at any time a particular need arises. For example, the pictures in Unit I are concerned with a day at school. These may be used with objects within each picture isolated to fit a given sentence pattern. They may be reused to teach plurals, such concepts as happy, warm, and cold, and verb forms.

UNIT II

TEACHER SUGGESTIONS

There are few suggestions for enrichment activities included in this or any of the following units. Included, instead, is a list of materials which are readily available. Most teachers have their own materials such as song, art work, and finger plays, which they may prefer to use with this program. It is felt that by omitting these suggestions a teacher may present a more creative and innovative program. The only parts of this oral English program which are rigid are the sentence patterning and sequence of presentation of these patterns. Situational English should be used whenever possible in the given structure.

Creativity may be stifled if a child is permitted to use only vocabulary in structure as presented in this program. It is therefore recommended that the child be encouraged to substitute his own vocabulary within the structure of the sentence.

No more specific directional English nor instructional English will be included in the Lesson Plan Units. Teachers should teach these directions and instructions as the need for them arises.

UNIT III

TEACHER SUGGESTIONS

The concept of an adjective as a modifier is hard for the speaker of Navajo to grasp. According to Robert Young there are no adjectives in the Navajo language. Adjectives are in the form of verbs. An example of this is:

English: It is red.

Navajo: It reds.

Watch carefully for the difficulty this presents to the Navajo child.

Negative questions are introduced in this unit and should be continued throughout the year. Teach the children the accepted English answer to a negatively posed question. It is very difficult for the Navajo child to learn to use the accepted answer.

Example: Teacher: "Didn't Mary get on the bus today?"

Navajo child: "Yes. (Implied) She didn't get on the bus today."

Acceptable answer: "No, Mary didn't get on the bus."

Second-order statements are introduced for the first time in this unit. A second-order statement is one used to modify some aspect of the concept that has been mastered.

Example: This dog is black

The first part of the statement, "This dog", serves as an identity holder. The second part of the statement tells something about the first part. "This dog is black" is not equivalent to "This is a

black dog." The second-order statement is infinitely expandable.

Example:

This dog is black. This black dog is old. This old black dog is running across the field.

This old black dog that is running across the field is chasing a rabbit.

The first-order statement form and the second order statement form constitute the basic teaching language. All of the basic concepts may be taught by using them.

UNIT IV

TEACHER SUGGESTIONS

Navajo speakers of all ages have great difficulty in distinguishing gender in pronouns when speaking English. The Navajo pronoun does not distinguish gender, nor does it distinguish between plural and singular in the third person. The Navajo language has a word which translates, "my sibling of the same sex as myself". The same word is used to denote male or female, depending upon the sex of the speaker. A great deal of work must be done in this area to help the Navajo child learn the gender of words as used in the English language.

Unit V

Teacher Suggestions

The teaching of verbs is one of the most important and most difficult parts of this program. The Navajo language is verb centered but has no past tense, no verb of being, and no verb to express having or giving. The verbs used in Navajo indicate number, how, and how many. The colors, as well as other adjectives, are expressed in verb form. Since the Navajo is time oriented to the present and there is no past form of the verbs, the English verb forms must be taught carefully and comprehensively. According to Robert Young, there are six modes and four aspects for each Navajo verb. The four aspects are:

1. Quick
2. Continuative
3. Semelfactive (action happening only once)
4. Repetitive

It is easy to see how confused a Navajo child might become with English verb usage.

Most verbs are taught first in the present participle form (ing form). Some of the exceptions are the verbs used when giving directions. These include such verbs as look, listen, see, bring, take, give, put, and color.

Verbs should be taught in the following order:

1. Regular intransitive verbs
2. Irregular intransitive verbs (THE PAST TENSES OF ALL IRREGULAR VERBS PRESENTED MUST
3. Regular transitive verbs (BE MEMORIZED BY ROTE BY THE CHILDREN.
4. Irregular transitive verbs

UNIT VI

TEACHER SUGGESTIONS

The work presented in this unit is partly review. The transitive verbs and verb forms are taught in the same manner as the intransitive verbs in Unit V. Infinitive forms are presented during this unit. This will be a new concept to the children because there are no infinitive forms in the Navajo language. The modals are among the function words which should be taught at this time.

The children should be allowed to give short answers to questions if the teacher is certain that the children know the long answer.

TEACHER SUGGESTIONS

The picture book PHILLIP AND HIS FAMILY was developed, primarily, as a conversation and vocabulary development guide for children in pre-education and pre-first situations in the Shiprock area. The pictures in this book may be used during the entire year with the oral English program. The writers believe **these** pictures will give the child something with which to identify, and thus encourage him to speak more freely. The pictures should also be an asset in helping the child develop his self-concept.

PHILLIP AND HIS FAMILY is organized in unit form, but the teacher may use individual pictures from any unit, at any time she feels the picture or pictures will implement her oral English presentation. These pictures should be used for general talking practice, and may be reused at any time a particular need arises. For example, the pictures in Unit I are concerned with a day at school, however, if the teacher so desires individual objects within the picture can be isolated to fit a given sentence pattern. They may also be reused to teach plurals, verb forms, and concepts such as happy, warm, and cold.
